SUSTAINABILITY

Given the fact, that the next new wave in city planning is “Eco-City”, in response to global climate changes crisis and considering that the concept of “eco-city” is sometimes observed as an ideal concept that is not possible to achieve in the real world; Elegancia Landscape believes in maintaining Landscapes that are healthy for people, the community and the planet. We are committed to the principles of sustainability, including educating our clients and the community about eco-friendly landscaping practices.

Elegancia Landscape is contributing in eco-city settlement where it allows the citizen to live and work using minimum and green resources.

As part of our ongoing strategy, we are dedicated to a quality policy of development and adherence. Our commitment to creating a sustainable environment is apparent in every project we undertake.

HEALTH & SAFETY

All injuries and incidents are prevented with the implementation of our safe working environment policy.

We conduct induction training into Elegancia Landscape's awareness safety scheme for all our new staff members and provide them with all the necessary PPE.

We maintain a healthy, safe and pollution free environment at all our offices and sites.

We have achieved an ongoing track record for over 1 million manhours without accident.

All our projects are constantly updated on protective environmental policies.

We continuously monitor our workforce accommodation for quality of living and lifestyle standards in compliance with environmental regulations and Qatar is directives for employee accommodation.

SERVICES

As part of our ongoing strategy, we created a quality management system to deliver the best following services:

- Design and Engineering

LANDSCAPE LIGHTING

Lighting is a key part of the combined project development. We believe that the beauty of the Landscape should be just as visible in the night, as it is in the day.

A unique lighting design is essential in every project we undertake. Landscape lighting brings life to every scene to highlight features such as the façades, swimming pools, fountains, gazebos, patios, trees and plants.

GREEN REVOLUTION IS THE ULTIMATE SOLUTION,

GREEN WALL SYSTEMS

NATURAL GREEN WALLS

Elegancia Landscape takes part in the urban world's rapid evolution, creating new infrastructures and concrete Landscapes. Elegancia Landscape introduced natural Green Walls in one of our prestigious projects "The Mall of Qatar, as bright and aesthetically pleasing addition to any public and private development.

ARTIFICIAL GREEN WALLS

For companies interested in the many decorative benefits of green walls, but wishing to avoid the upkeep and maintenance of living plants, Elegancia Landscape offers artificial green walls as the perfect substitute. The flexibility of the structures creates dramatic, vivid focal points while consuming very little floor space, allowing for their easy incorporation into spaces of any size or shape and without the required consideration for irrigation systems and maintenance access. The artificial foliage is an attractive, long lasting and cost effective solution for any project.

NURSERY

By definition, a plant nursery is an enclosed or fenced area designated for the short term and longtime growing of the plant materials in anticipation of moving them to other sites or location at their appropriate maturing; that's why we have one of the biggest nurseries in the GCC with an area of 500,000 m². The plants and related flora placed in your project, will be the most important for your Landscape success.

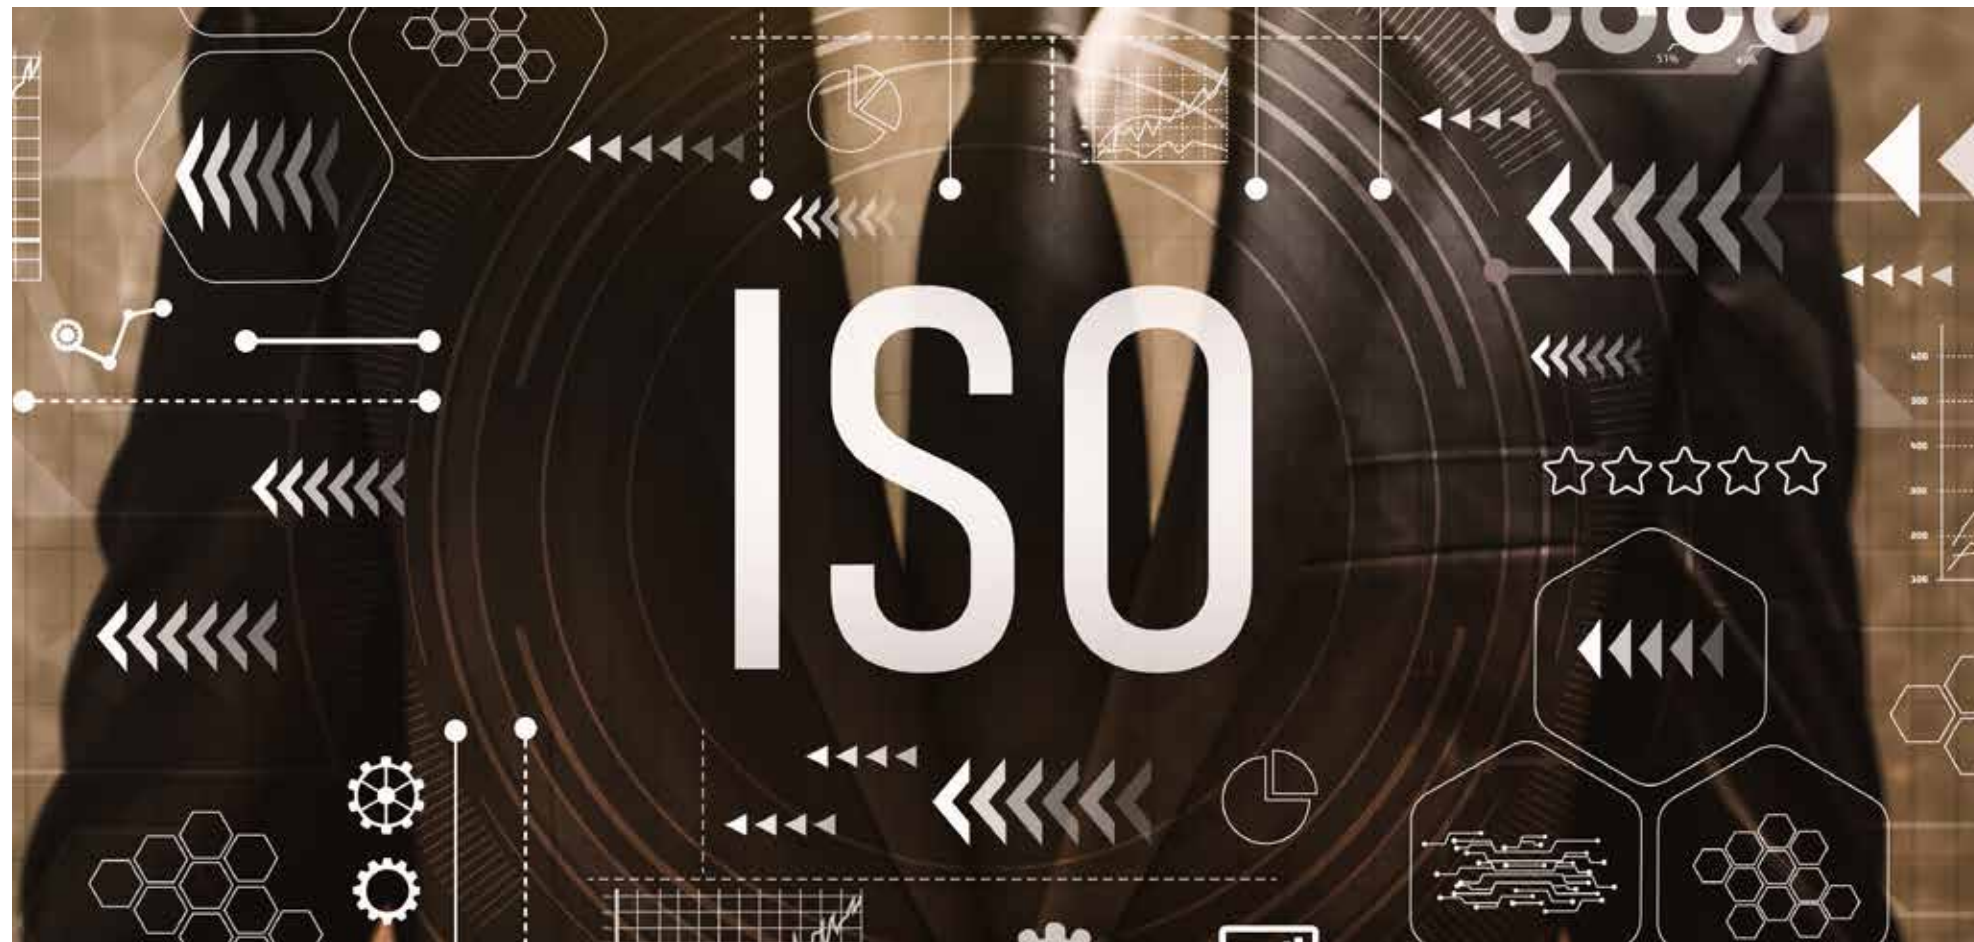

- Massive Stock of Plant and Trees
- Production Facilitation like Green House
- Soil Mixture Preparation Area
- Store for Nursery Materials
- Native Plant like Shrubs and Trees
- Different kinds of High-Quality Turf Area
- Professionally Qualified and Well Experience managerial and supervisory expertise
- Over 200 nos. of gardeners, operators, and skilled labors.

We are constantly improving to keep our nursery up to date and innovative to supply our project with the first plant sample with the appropriate specification in the region.
